In order to accommodate the proposed connection at the development, upgrade works are required to increase the capacity of the water network. These works are currently estimated to include the following and would require further review via pressure and flow assessment at connection application stage:

- Network adjustments to valving arrangements/DMA's on the existing network
- Upgrade approx 900m of 6" uPVC/AC main to 300mm ID
- Upgrade approx 300m of 6" AC main to 300mm ID

It should be noted that, there is approx. 180m pipe crossing bridge over the Avoca river included in the upgrades here. This is a protected bridge and necessary statutory consents would be required.

Uisce Éireann does not currently have any plans to carry out the works required to provide the necessary upgrade and capacity. Should you wish to have such upgrade works progressed, Uisce Éireann will require you to provide a contribution of a relevant portion of the costs for the required upgrades.
